

Why Volks City?

Nobody better understands the importance of your car to you. We all have hectic and busy lifestyles and to take time-out to get the car serviced or repaired can be a real bore! Well, no more —

Courtesy Cars

Volks City have three 'free' courtesy cars available that can be used by service customers. They ask you to pay a small mileage charge to cover the petrol and insurance &c., **(the first ten miles are free).**

Collection & Delivery

Busy time schedule? For a *small additional charge*, (£10-£15) Volks City can collect and deliver your car from your Plymouth office.

They can be at your office as early as you want, and have your car back to you before you are ready to leave. If you live within a

ten miles radius of the Plymouth City centre, you can ask to have your car collected from your home. (They want your day to be as hassle free as you do). (£10-£25)

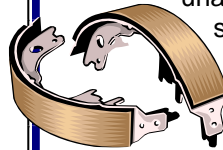

Alternatively, you can ask for a free lift into and from the Town-Centre where you can shop or browse at your leisure. There is a selection of theatres & good restaurants. Volks City's mission statement is very clear - *"Both they and your car are meant to serve you!"*

You now have a **real-alternative** —

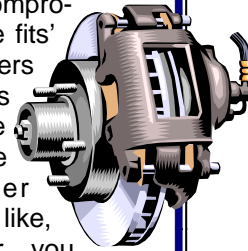

Volks City
VW Audi Seat & Skoda
Sales Service & Repair

What about cost?

Unlike some companies which offer cut price products, Volks City do not compromise on product quality. Local 'free fits' are no such thing and general repairers are increasingly finding themselves

unable to cope with the sophistication that the modern car owner demands. Like for like, Volks City will offer you favourable cost savings over its competitors and beat their service, hands-down.

What about tools & equipment?

No problem! Volks City is an approved and fully appointed **Autodiagnos[®]Centre**. This means that they have the latest electronic interrogation and diagnostic equipment available to a specialist repairer. Regular training and technical updates ensure that you are kept in pole-position as regards your vehicle's performance and reliability. On-board computers now control nearly every aspect of a car's functions and so the modern owner demands a very high standard of training and expertise from his or her service workshop.

Air-conditioning is now standard fitment on most new production models. Volks City has the most up to date equipment available to service & repair all systems, safely and reliably. Don't forget to ask for a **free system check** on your next **Full-Service!** *You may be surprised to learn that you can naturally lose 5%-10% of your refrigerant each year, leading to poor performance and an overworked compressor.*

What about quality?

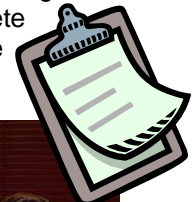

All of Volks City's products come with a twelve months/12000 mile guarantee — some, like their clutches and batteries, are covered for two years or more. All of their products are legitimately branded, and, in a lot of cases, are made by the original equipment manufacturers. As for the quality of workmanship — Volks City uses qualified and experienced staff and offers an unconditional warranty against faulty workmanship—no time limit, no fuss. From a computerised, electronic diagnosis, to a wash and internal valet*, Volks City's servicing is carried out to the very highest standards, both in expertise and in cleanliness. Their detailed invoices help you to keep track of all that you have had done and all replaced parts are cleaned and bagged for your retention, should you require them. *The wash and valet are an optional extra

What about documentation?

Accurate and clearly itemised documentation and stamped service schedules add to the resale value of your vehicle and Volks City's high standards of servicing mean that you will have complete peace of mind throughout the ownership of your car.

Volks City has designed its own service schedules and so it is important to compare service detail and price when 'shopping around' for service pricing. You will find that most advertised full-services equate only to Volks City's medium-service. Volks City's Full-Service includes a full road test, both before & after with a free *Autodignos*[®] diagnostic interrogation (worth £85). You will not find a more thorough service schedule or better value for money, anywhere else.
